

since **1999** 

### Founding and expansion:

**Economy** was already founded in 1999 as a web-based information-, service- and event-platform, dealing with the main-topics of business-oriented technology and innovation for companies and administration.

From 2005 Economy has also appeared as a printed Weekly-Newspaper with a circulation of 30.000 (ÖAK Audit).

The EU-Commission nominates the platform out of 162 European ICT-Initiatives for Industry & Research as a EU-Modelproject.

**58.000 readers** and 6.600 decision-makers are counted by Media-Analysis (MA and LAE) as the latest **current coverage** for the printed magazine. Austrian Webanalyse counts **37.214** Un.**Clients** & **116.633 PIs** as the first range for the internet-magazin.

In 2011 both titels were merged into the current Business-Magazin and the channels "Education" & "Research" were introduced.

In **2015** followed a **complete** technical, graphical and editorial **relaunch** of portal and magazin and its appereances on Facebook, Twitter and You Tube. The channels "Service" and "Life" werde additional founded and introduced.

**2016** Economy publishes as **the first** Internet-Businessmagazin **in Europe** an **own Video-Channel** with Best Practice for business innovations, applied F&E-Projects and News in Business & Tech. From **2020** on (longer) **Doku-Videos** followed.

## **Editorial Philosophy:**

On the basis of a social and educational promted national-economy, economy occours for an internationally competitive business and research location in Austria. **Economy** adresses decision-makers from today and tomorrow which appreciate sustained journalism and enjoyment with usefull informations, especially "out of home".

"We are the only medium with its sole focus on the subjects of education, innovation and business and the sole focus to decision-makers. As an additional service to our readers and users, no traditional online-advertising exists on economy. On the contrary, we offer the advertising-industry new communication-forms of Content- and Native Advertising. This ads are placed precisley in a suitable topic environment, without wastage in reaching the target group of decision makers.

Christian Czaak, editor.
